

Seahorse H5

- A Yacht That Can Fly

SH5 takes off from, lands on, and moves on water or land.

Navigates as a yacht near the shores. In its airborne mode the SH5 flies just 15 meters (50') above sea level (lower than the masts of typical sailing yachts), to ferry 650 kg of people & cargo for 3 hours along coasts/islands/atolls @150kmph up to 450kms.

The SH5 can survive failure of half its drivetrain – and continue to stay airborne or land safely on water or nearby ground in just 8 seconds in an emergency. It is designed to survive a free fall on water from 50'.

Specifications:

- Range: 3 hours, 450 Km
- Speed: 150 Km/h
- MTOW: 1600 Kg
- Payload: 650 Kg
- Thrusters for moving on water
- Wheels for moving on land.
- Partial Thrust Vectoring for forward movement

Features:

- Pilot plus 4 passengers
- Luxurious, air conditioned interiors with panoramic windows and a standing aisle
- Airbags + Life vests on each seat
- Luggage includes check-in bags + 4 cabin bags + handbags
- Built-in Toilet, wash basin, pantry
